Department of Health and Human Services

Department of Health and Human Services - Centers for Disease Control – OSTLTS - Strengthening Public Health Systems and Services Through National Partnerships to Improve and Protect the Nation’s Health

Proposal Due Date: March 29, 2018
Expected Number of Awards: 24
Estimated Total Program Funding: $40,000,000
Award Ceiling: $150,000
Award Floor: $150,000
Funding Opportunity Number: CDC-RFA-OT18-1802

Purpose: The purpose of this notice of funding opportunity (NOFO) is to announce a program to strengthen the nation’s public health infrastructure, ensure a competent, current and connected public health system, and improve delivery of essential services through capacity building assistance (CBA). CBA is defined as activities that strengthen and maintain the infrastructure and resources necessary to sustain or improve system, organizational, community or individual processes and competencies. CBA is delivered through technical assistance, training, information sharing, technology transfer, materials development, or funding that enables organizations to serve customers better and operate in a comprehensive, responsive, and effective manner. The goal is to fund organizations that have the capability, expertise, resources, reach, and history of providing capacity building relevant to implementing this program’s key strategies, activities, and outcomes. The program strategies include strengthening the capacities of health systems infrastructure; leadership and workforce; data and information systems; communication and information technology; partnerships; laws and policies; and programs and services. Capacity building efforts of this program are expected to strengthen and optimize the public health system and services to improve the nation’s health.

Department of Justice

Department of Justice - Office on Violence Against Women - OVW FY 2018 Grants to Reduce Sexual Assault, Domestic Violence, Dating Violence and Stalking on Campus Program - Updated

Proposal Due Date: March 7, 2018
Expected Number of Awards: 45
Estimated Total Program Funding: $20,000,000
Award Ceiling: $750,000

Funding Opportunity Number: OVW-2018-14263

Purpose: The Campus Program encourages a comprehensive coordinated community approach that enhances victim safety, provides services for victims and supports efforts to hold offenders accountable. The funding supports activities that develop and strengthen trauma informed victim services and strategies to prevent, investigate, respond and prosecute sexual assault, domestic violence, dating violence and stalking. The development of campus-wide coordinated responses involving campus victim service providers, law enforcement/campus safety officers, health providers, housing officials, administrators, student leaders, faith-based leaders, representatives from student organizations, and disciplinary board members is critical. To be effective, campus responses must also link to local off-campus criminal justice agencies and service providers, including local law enforcement agencies, prosecutors’ offices, courts, and nonprofit, nongovernmental victim advocacy and victim services organizations. Campuses are encouraged to create or revitalize large-scale efforts that treat sexual assault, domestic violence, dating violence, and stalking as serious offenses by adopting effective policies and protocols, developing victim services and programs that prioritize victim safety, ensuring offender accountability, and implementing effective prevention approaches. Colleges and universities should demonstrate to every student that these crimes will not be tolerated, that perpetrators will face serious consequences, and that holistic services are available for victims.

National Aeronautics and Space Administration

Proposal Due Date: March 30, 2018
Expected Number of Awards: 
Estimated Total Program Funding: 
Award Ceiling: 
Award Floor:
Funding Opportunity Number: NNH17ZDA001N-HSWO2R

Purpose: In response to the need to advance and coordinate the Nation’s space weather research and operations capabilities, NASA and NOAA are supporting a pilot funding opportunity to promote space weather operations-to-research (O2R) activities. O2R activities can broadly be defined as the joint pursuit of improvements of operational capabilities and advancements in related fundamental research. This includes the space weather community working to upgrade and enhance: (1) existing operational models and products, (2) the communication of operational priorities and capabilities to the research community, (3) the testing and evaluation of operational model performance by researchers for fundamental scientific discovery and for improved operational services, and (4) the identification of gaps in the fundamental understanding of the physical system that impede operational capabilities.

National Aeronautics and Space Administration - NASA Headquarters - ROSES 2017:

Juno Participating Scientist Program

Proposal Due Date: March 1, 2018

Expected Number of Awards:  
Estimated Total Program Funding: 
Award Ceiling: 
Award Floor: 

Funding Opportunity Number: NNH17ZDA001N-JUNOPSP

Purpose: NASA invites proposals that address outstanding science questions about or related to the Jupiter system and that require the use of Juno mission data not yet publicly available. NASA expects the submission of proposed science investigations that fall within the scope of the Juno science objectives but also strongly encourages proposals that leverage Juno’s anticipated mission data to conduct studies not within the scope of the mission.

The objective of the Juno Participating Scientist Program (Juno PSP) is to enhance the scientific return during the science phase of the Juno mission by expanding participation in the mission through new investigations that broaden and/or complement existing mission investigations. The Principal Investigator (PI) of a selected proposal, and that person alone, will be added to the Juno Science Team as a Participating Scientist and will be given all of the rights and responsibilities of Juno Co-Is, as per the Juno Rules of the Road. In the case that a proposal names a Science PI, that individual (and not the named Principal Investigator) will be added to the Juno Science Team as a Participating Scientist; for these proposals, "Principal Investigator" means "Science PI" and the proposal Principal Investigator will be considered a Co-Investigator.

National Endowment for the Humanities

National Endowment for the Humanities - Fellowships
Proposal Due Date: April 11, 2018
Expected Number of Awards:
Estimated Total Program Funding:
Award Ceiling: $60,000
Award Floor: $30,000
Funding Opportunity Number: 20180411-FEL

Purpose: Fellowships support individuals pursuing advanced research that is of value to humanities scholars, general audiences, or both. Recipients usually produce articles, monographs, books, digital materials, archaeological site reports, translations, editions, or other scholarly resources in the humanities. Through NEH-Mellon Fellowships for Digital Publication, the National Endowment for the Humanities and The Andrew W. Mellon Foundation jointly support individual scholars pursuing interpretive research projects that require digital expression and digital publication. To be eligible for this special opportunity, an applicant’s plans for digital publication must be essential to the project’s research goals. That is, the project must be conceived as digital because the nature of the research and the topics being addressed demand presentation beyond traditional print publication. Successful projects will likely incorporate visual, audio, and/or other multimedia materials or flexible reading pathways that could not be included in traditionally published books, as well as an active distribution plan.
